

TEAM ONBOARDING

Onboarding Guide

Everything you need to know to start working and follow the correct workflow.

Create Your Account

Before anything else, you need to create an account on the **Annotation Platform**. This is the main tool we use for claiming tasks, tracking projects, and reviewing your work.

Sign up on the platform

1

Open the platform

Go to the Annotation Platform dashboard at the link below.

2

Create your account

Sign up using your work email and complete the registration form.

3

Log in to your dashboard

Once registered, log in to access your projects, queue, and feedback.

Platform link

<https://annotation-platform-henna.vercel.app/dashboard>

Use the right email

You must use the **same email you registered with** when you start working, and that email **must match the one on your LinkedIn account**. Using a different email can stop you from being assigned work.

What you'll use the platform for

Claim tasks

Pick up and start working on the tasks available to you.

View projects

Browse the projects you're assigned to and their progress.

Score and feedback

Check your scores and read the feedback you receive on your work.

Tasks to fix

See which tasks need to be corrected and follow up on them.

Tip

Bookmark the dashboard link. You'll be coming back to it every day.

START WORKING

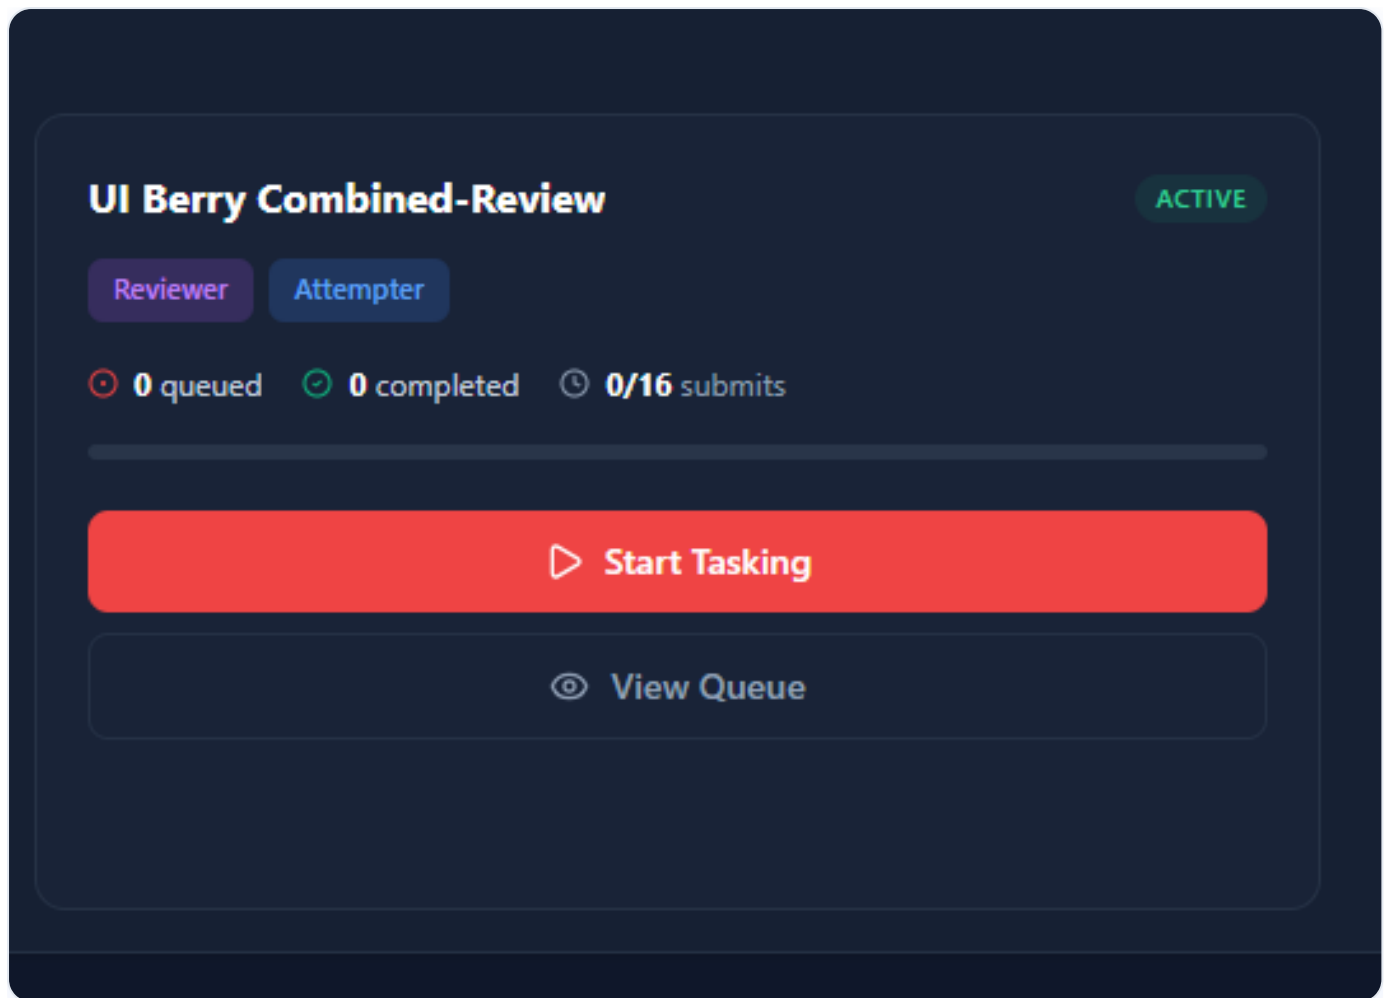

2

Claim and Start a Task

When you're ready to work, you claim a task from your dashboard and then open it in **Feather** to do the work.

Step 1: Start tasking from the dashboard

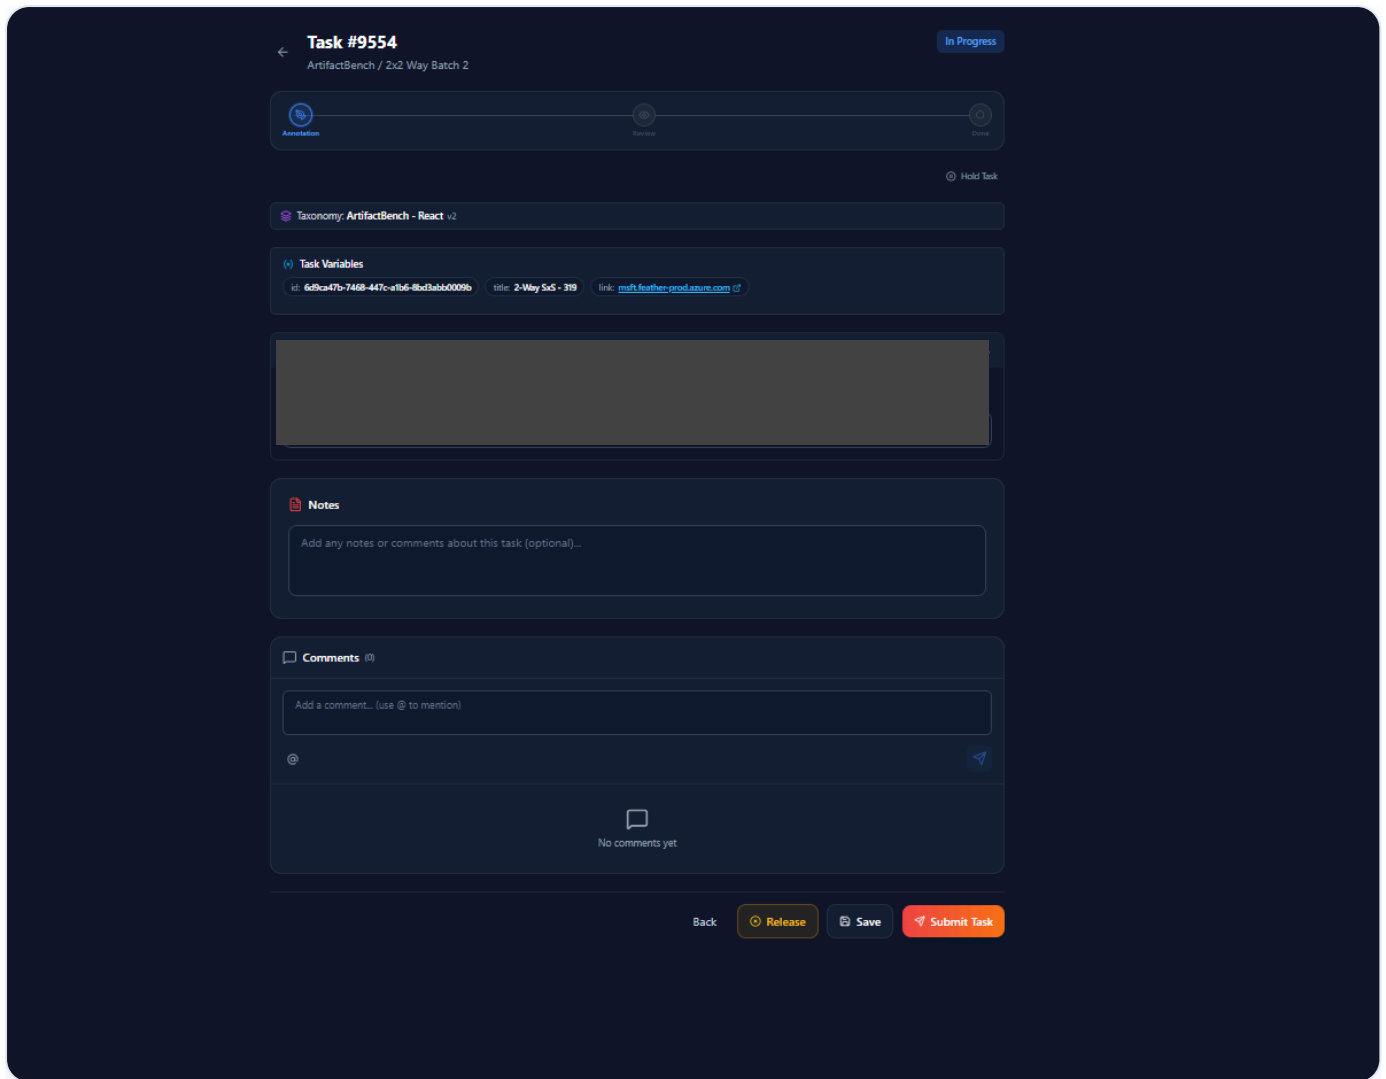

On your dashboard, find the project assigned to you and click **Start Tasking**. This claims the next available task for you.

The project card on your dashboard. Click **Start Tasking** to claim a task.

Step 2: Review the task view

After claiming, you'll see the task view shown below. It contains the taxonomy, the **Task Variables**, the **Attempt URL** field, and the Notes and Comments areas.

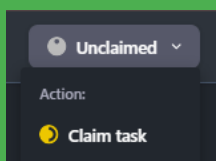

The task view after claiming. Note the **link** inside Task Variables.

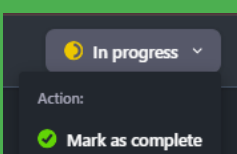

Step 3: Open the task in Feather

To work on the task in Feather, click the **link** in the **Task Variables** section. That link takes you straight to the task in Feather.

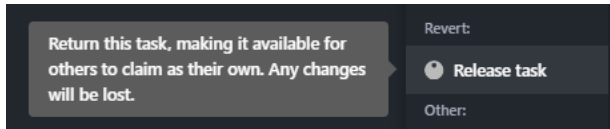

On Feather

1 Change the task status in the right upper corner, from unclaimed to claim task

2 After finishing the task, change the status from "In progress" to "Mark as complete"

Release the task on Feather if you are not going to work on it

Step 4: The action buttons

At the bottom of the task view you'll find the action buttons. They must always match what you did in Feather.

Button	What it does	Use it only when...
Release	Rejects the task.	You also release it in Feather.
Submit	Sends the task to Review.	You also did Complete in Feather.

⚠ Keep both sides in sync

Always match the action on the platform with the action you took in Feather. Never Submit on one side and Release on the other.

YOUR WORKSPACE

3

My Profile and Task History

Your **My Profile** page is your personal workspace. Under the **Task History** tab you'll find every task you've worked on, as an attempter or a reviewer, along with its score, status, and the feedback you received.

The Task History tab: a full record of your work.

What you can see here

Task history

The full list of tasks you've worked on, as attempter or reviewer.

Open for feedback

Open any task to read the feedback left on your work.

Score

Check the score given to each task and your average score.

Status

See the current status of every task at a glance.

Tip

Use the filters at the top (Project, Batch, Status, Role) to quickly find a specific task in your history.

4

YOUR WORKSPACE

Daily Limits

Under the **Daily Limits** tab you can check how many tasks you're allowed to claim or submit each day. **Every project has its own separate limit.**

The Daily Limits tab: each project shows its own daily cap.

How the limits work

- **Per-project caps:** each project caps how many tasks you can claim or submit per day. The limits are independent from one another.
- **Net of voluntary releases:** if you claim a task and then release it yourself, it does **not** count against your limit.
- **Timeouts and admin releases do count:** because the task was held under your name, these still count toward your daily total.
- **Resets at midnight UTC:** your "submits today" counter goes back to zero every day at midnight UTC.

 Important

Don't let tasks time out. Timeouts count against your daily limit even though you didn't submit them. If you can't finish a task, release it yourself instead.

5

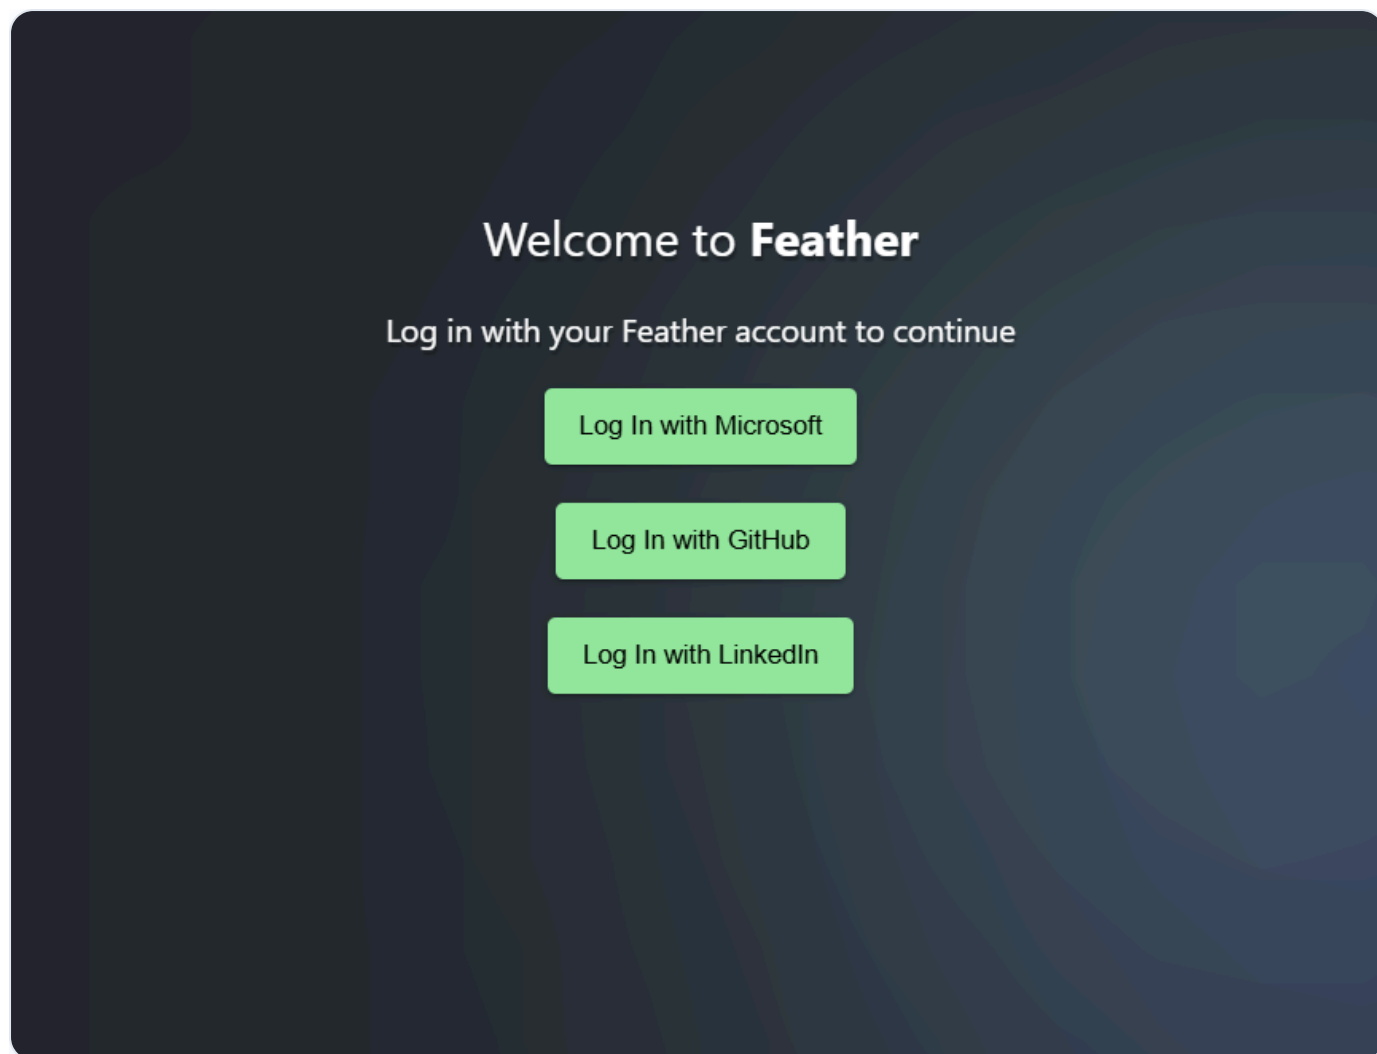

DOING THE WORK

How to Work in Feather

Feather is where you do the tasks. The first step is logging in correctly.

Log in to Feather

On the Feather welcome screen, choose **Log In with LinkedIn**.

*The Feather login screen. Log in with **LinkedIn**.*

 Use the correct email

Your **LinkedIn email must be the same one you provided to start working**. If it doesn't match, you won't be able to access your tasks correctly.

 Having trouble?

If you have any problem logging in or with your email, **contact the QMs group** for help.

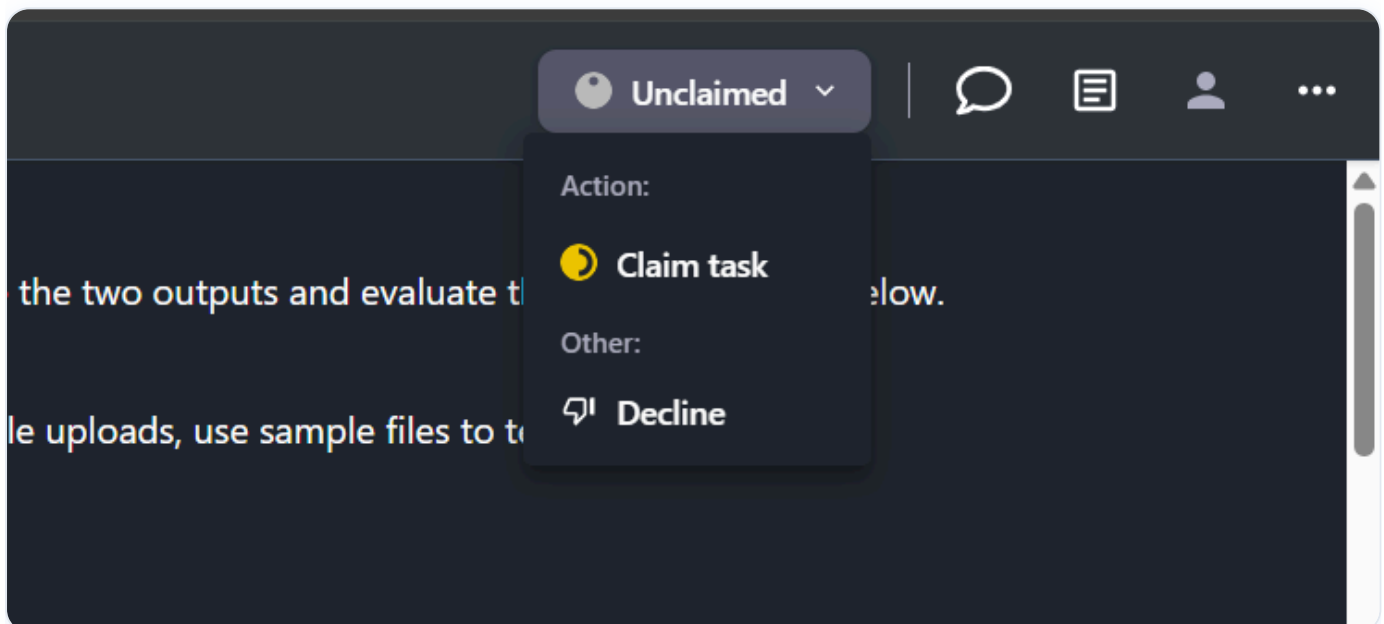

What you'll see when you open the task link from Annotation platform:

The task in Feather. Read the instructions and prompt carefully before you start.

Claim the task in Feather

To claim the task, click on **Unclaimed** (top right), then select **Claim task**. The task is now assigned to you and you can start working on it.

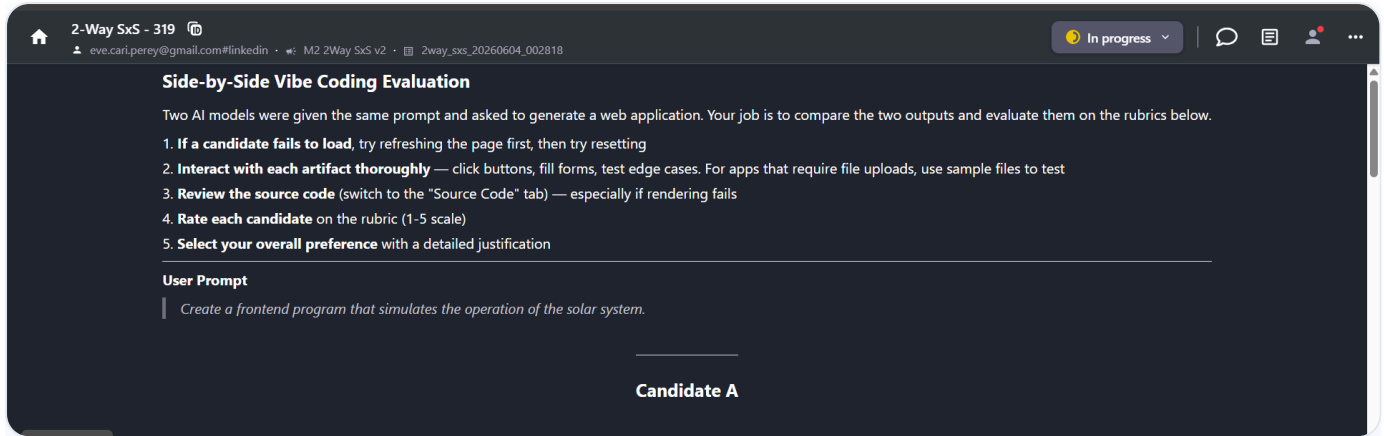

*Click **Unclaimed**, then **Claim task** to take the task.*

⚠ Remember the Attempt URL

After claiming in Feather, copy the task URL from your browser and paste it into the **Attempt URL** field back on the Annotation Platform (see Section 2).

The task moves to "In Progress"

Once claimed, the task status changes to **In Progress** and the task is yours to work on.

After claiming, the task status becomes **In Progress**.

Claim time limit (4× the AHT)

You can't hold a claim for longer than **4× the task's AHT** (Average Handling Time). For example, if the task's AHT is **15 minutes**, you cannot keep the claim for more than **1 hour**. If you go over the limit, the task can be **unassigned** and you lose your work, which means you **won't get paid for that task**.

6

What if the task is not unclaimed on Feather?

If this happens, don't do anything on Feather, click No in this question on Annotation and Release the task. If you can, create a topic on #general channel with the Annotation Link, so we can search for the issue.

Could you submit this tasks in Feather?

Could you be able to claim and submit the task in Feather? *

YES - I was able to claim and submit the task in Feather / NO - I couldn't submit it. The task is already signed-off or Completed, or any other unavailable status

DOING THE WORK

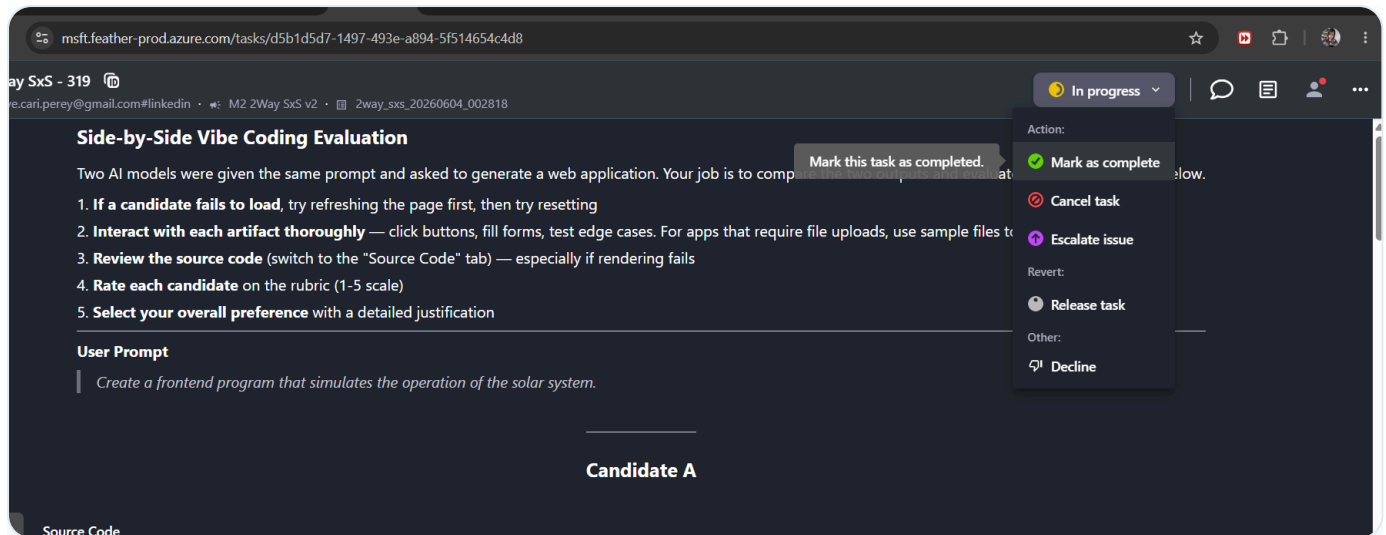

7

Submitting a Task in Feather

When you've finished a task in Feather, you submit it from the status menu. You have to choose the right option.

Step 1: Open the status menu and Mark as complete

Click the **In progress** status menu (top right) and select **Mark as complete**.

Open the status menu and choose **Mark as complete**.

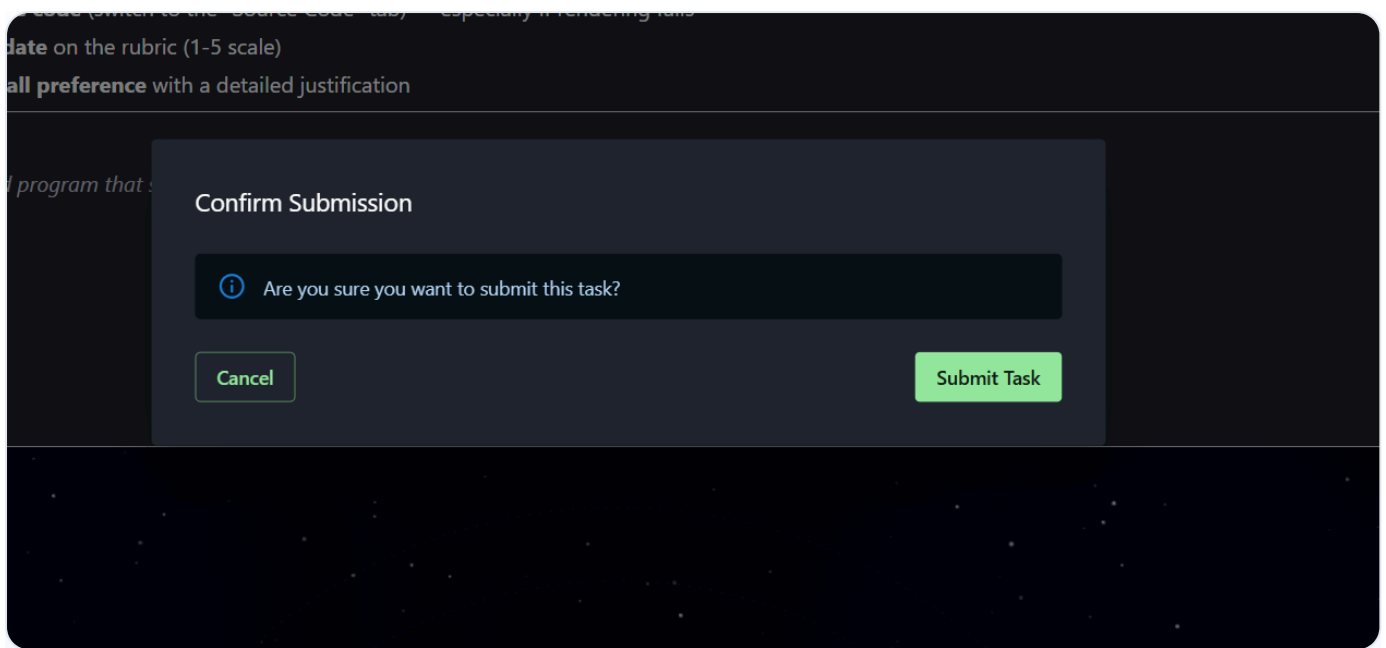

⚠ Never use these options

NEVER click **Cancel task** or **Escalate issue**. If you need to let go of a task, use **Release task** instead.

Option	When to use it
✅ Mark as complete	When you've finished the task and want to submit it.
🔄 Release task	When you need to let go of the task without finishing it.
❌ Cancel task	Never.
❌ Escalate issue	Never.

Step 2: Confirm the submission

A confirmation dialog will appear. Click **Submit Task** to finish.

Confirm by clicking **Submit Task**.

⚠ Mirror this on the platform

After you Submit in Feather, you must also **Submit** on the Annotation Platform. The two actions must always match (see Section 2).

REVIEWER FEEDBACK

8

Fixing a Task (Requested Changes)

Sometimes a reviewer will send a task back to you with requested changes. Here is how to handle it, from finding the feedback to marking the task as fixed.

Step 1: Find the task that needs changes

Go to your **Task History** or your **Notifications** to find the task that was sent back.

Step 2: Read the feedback and score

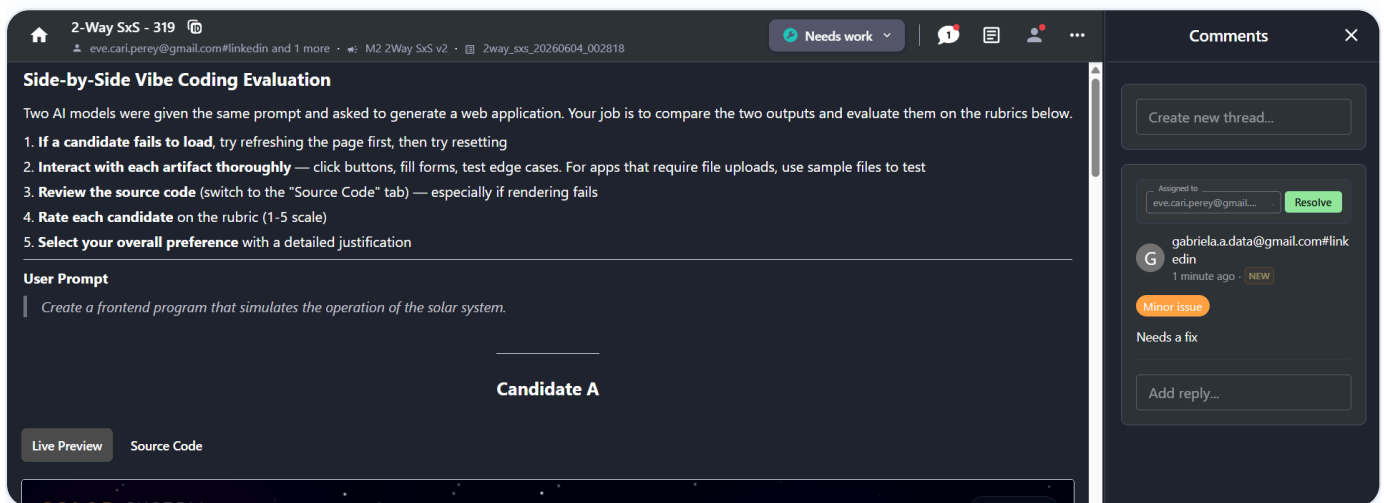

Open the task in the Annotation Platform. There you'll see the **feedback** and the **score** the reviewer left. If they requested fixes, you'll continue to Feather.

⚠️ Open the **RIGHT** link

For a task that needs fixing, open the **link you pasted in your Task History (the Attempt URL)**, **NOT** the task variable link you used the first time. This applies **only to tasks that need fixing**, not to approved ones.

Step 3: Read the reviewer's comments in Feather or Annotation

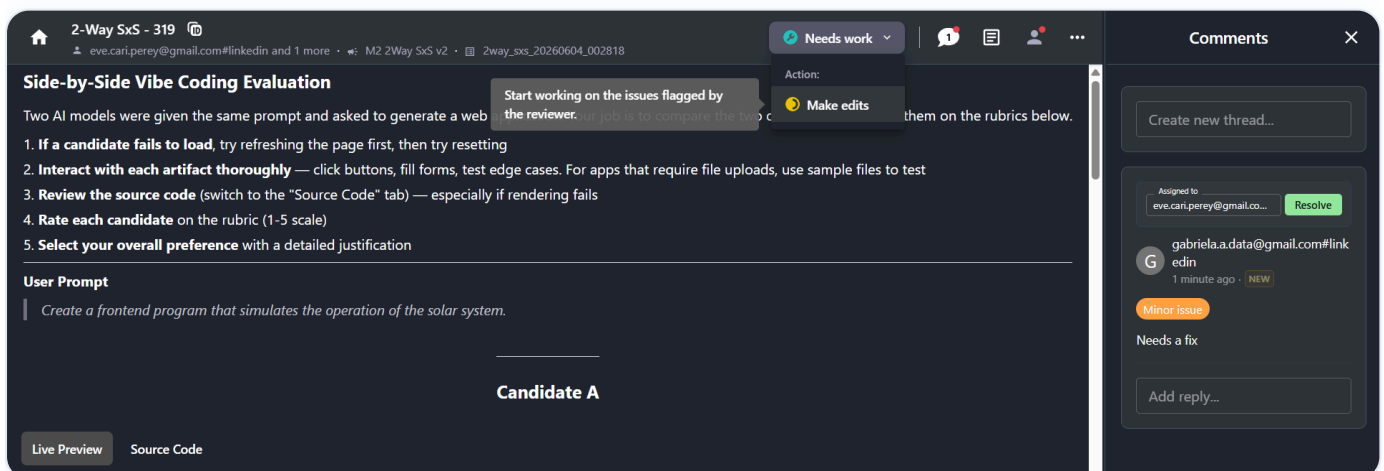

Once the Feather task opens (its status will show **Needs work**), click the **message icon** to open the comments panel. Read the feedback and do exactly what was requested.

Open the comments panel to read the reviewer's feedback ("Needs work" status).

Step 4: Make edits

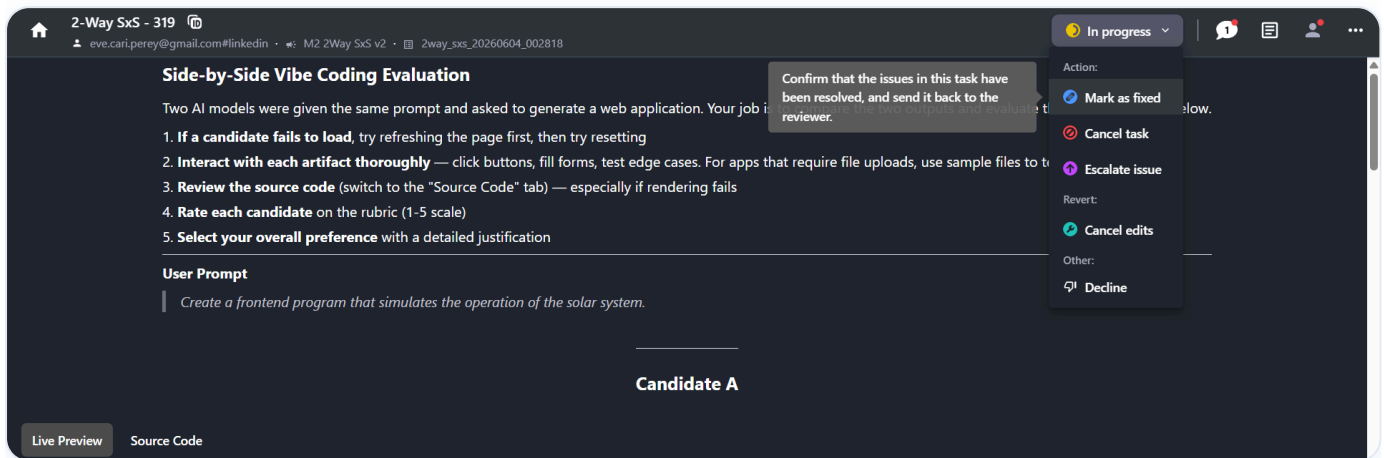

To start fixing, open the status menu and click **Make edits**. This lets you work on the issues the reviewer flagged.

*Click **Make edits** to start working on the requested changes.*

Step 5: Mark as fixed

When you've completed **all** the requested changes, open the status menu and click **Mark as fixed** to send the task back to the reviewer.

Click **Mark as fixed** to return the task to the reviewer.

❌ Same rule as before

Never use **Cancel task** or **Escalate issue**. Only use **Make edits** and then **Mark as fixed** when correcting a task.

PROJECT INSTRUCTIONS

9

Annotation Hub

The **Annotation Hub** is where you'll find the instructions for every project you're assigned to. Always read them before you start working.

🔗 Platform link

<https://annotation-hub.vercel.app/>

Logging in for the first time

1

Use the same email

Log in with the **same email** you use on the other platforms.

2

First-time password

The first time you log in, use the password **123456**.

3

Change your password

Once you're in, you can change it to a password of your own.

Forgot your password or can't log in?

If you forget your password or have any access problem, send a message to the **QMs** and we'll reset your password for you.

Tip

Read the project instructions in the Annotation Hub **before** claiming your first task. They tell you exactly how each project should be done.

STAY ON TRACK

10

Staying in the Project

To keep working on a project, you need to keep your score up and stay connected to the team's communication channels.

Minimum overall score: 3.5

To stay on a project, your **overall score must not drop below 3.5**.

Stay on top of communication

Please always keep an eye on:

Slack channels

Check the Slack channels regularly for updates and announcements.

Instructions

Read and follow the instructions for each project carefully.

Slack Guide

Learn how to use Slack correctly. Reading and following this guide is **just as important as following each project's instructions**.

<https://annotation-hub.vercel.app/slack-guide>

Tip

Turn on Slack notifications so you don't miss a reviewer's message or an important update.
